December 18, 2024

Department of Health and Human Services

Helping people. It's who we are and what we do.

Agenda

1. SHA Steering Committee: New Member Recommendation Process
2. Needs and Infrastructure Assessment Findings Preview
3. SHA Resource Center Preview and Landscape Analysis
4. School Billing System/EHR Procurement
5. CMS School Health Services Grant Update
6. January SHA Steering Meeting – *scheduling in-process*
7. Closing

SHA Steering Committee Process for New Member Recommendations

Needs and Infrastructure Assessment

Preview of Findings from the Final Needs and Infrastructure Assessment

Needs Assessment Timeline

Data Sources

Annual DHCFP School Survey (February-March 2024):	21 responses from 13 districts
DHCFP Statewide School Listening Tour (March-May 2024):	14 districts
SHS Program and Claims Data (October-November 2024)	Publicly available data on Nevada's LEAs
Focus Groups with LEAs on EHRs (November 2024):	2 focus groups, 90 minutes each. Participants from 10 LEAs were represented across the sessions.
Focus Group with School Health Access (SHA) Steering Committee (November 2024):	State agency representatives, LEAs, and parents
Stakeholder Feedback Session (December 2024):	12 participants from 6 LEAs

Non-participating LEAs

Participation in the SHS program is uneven across Nevada's LEAs, with small, rural districts facing notable barriers.

- Counties not participating (highlighted in blue) are **typically rural and have small total student enrollments**
- 90% of students eligible for free and reduced lunch (FRL) in Nevada are enrolled in schools in districts that are already participating in the program.
- Nevada students eligible for FRL attending schools in participating districts would increase by 8%, reaching 98.9%, if the State Charter Authority and Pershing were to begin billing.

Medicaid Billing Complexities

Medicaid billing complexities limit SHS program participation and reimbursement

Survey Responses: “On behalf of your school district, what challenges are you currently facing regarding Nevada Medicaid and school health services?”

Challenges	Number of respondents	Percentage of respondents ¹¹
Billing issues—do not know how or do not have the capacity to bill Medicaid for services or another billing issue	15	71%
Policy issues—the Medicaid Services Manual and Billing Guide are too confusing and complicated to understand or another policy issue	9	43%
Communication issues—do not know who to contact to get help or another communication issue	6	29%

- Documentation burden
- Misalignment of professional licensure
- Limited staff capacity for Medicaid program’s administrative responsibilities
- Lack of understanding of billing procedures and codes
- Suggested new role: expert coder

Barriers to Services in Rural and Tribal Communities

Barriers to access and a lack of trust in school mental health services limit participation in rural and Tribal communities.

- **Challenges Identified**

- Geographic isolation and limited resources
- Cultural dynamics leading to mistrust in school mental health systems
- Workforce diversity gaps

- **Barriers to Service Access**

- Misconceptions about scope of mental health services
- Irregular onsite availability, affecting trust especially for Tribal populations and enrollment assistance

- **Suggested Solutions**

- Develop targeted educational materials to clarify service scope
- Cultural engagement and community outreach
- Explore telehealth options, addressing mistrust and underutilization

Workforce Shortages

Workforce shortages, especially in rural areas, restrict Medicaid program capacity and increase administrative strain.

- **Qualified Provider Scarcity**

- Leads to restricted Medicaid service delivery
- Results in longer wait times for student services

- **Recruitment & Retention Issues**

- Challenge in hiring providers familiar with rural/Tribal needs
- High turnover rates exacerbate service continuity problems
- Geographic isolation in rural areas limits access to mental health professionals

- **Medicaid Billing Complexities**

- Insufficient staff knowledge increases reliance on external billing agents
- Risk of billing errors and delays due to lack of specialized expertise
- School services misaligned with outpatient-focused Medicaid billing model

Common EHRs

Successful adoption of a common EHR system requires district input, tailored design, and comprehensive staff training, but many LEAs lack resources to invest in suitable systems.

- **System Compatibility & Integration**

- Standardization across districts benefits data transfer and student mobility
- Challenges with data sharing and validation between SIS, EHRs, and billing platforms

- **Resource Limitations**

- Many districts lack staff and technological expertise for system customization
- Complexity of navigating multiple documentation and billing options is overwhelming

- **Statewide System Considerations**

- Mixed opinions on adopting a common statewide billing and EHR system
- Potential solution requires careful development, practitioner buy-in, and comprehensive staff training

- **District Involvement & Customization**

- Essential to include district input in EHR system development
- Tailored design needed to meet specific LEA needs and integration requirements

Findings

Needs Assessment Findings

1. Participation in the SHS program is uneven across Nevada's LEAs, with small, rural districts facing notable barriers.
2. Medicaid billing complexities limit SHS program participation and reimbursement.
3. Barriers to access and a lack of trust in school mental health services limit participation in rural and Tribal communities.

Infrastructure Needs Assessment Findings

1. Workforce shortages, especially in rural areas, restrict Medicaid program capacity and increase administrative strain.
2. Successful adoption of a common EHR system requires district involvement, tailored design, and comprehensive staff training.

SHA Resource Center

SHA Resource Center Preview and Landscape Analysis Discussion

The SHA Resource Center will serve as a centralized hub that is well-structured with easy navigation to educate, engage, and empower parties in operationalizing school health services.

School Health Access Resource Center

Get the School Health Services Guide

This guide helps Nevada LEAs join and manage the Medicaid School Health Services program, with steps for enrollment, billing, and compliance
PDF GUIDE COMING SOON

EPSDT

Early Periodic Screening, Diagnostic Treatment ensures Medicaid provides regular checkups and care for kids under 21, covering screenings, doctor visits, and necessary treatments even beyond standard coverage. Medicaid

Periodicity Schedule

The American Academy of Pediatrics Periodicity Schedule guides the delivery of age-appropriate care, aligning with Medicaid requirements to address routine and emergent health needs in students.

Behavioral Health

All School Health Resources

Landscape Summary

- An evaluation of state school-based Medicaid program resource centers identified common themes, strengths and weaknesses
 - Scope included other grant recipients and states that covered services outside of IEP

Favorable Design Features

- Advanced, searchable repository
- Program information (e.g., handbook, billing tools and instructions, forms and logs, school contact information and LEA Assignments)
- FAQ documents and logging questions asked/answered
- Informative newsletters or memos to share updates
- Recorded trainings and self-paced modules
- Steering committee agendas, notes, materials
- Referencing federal guidance (e.g., CMS informational bulletins)
- Calendar

Medicaid SBS Clarification Form

Use the **online Medicaid SBS Clarification Form** to submit questions, concerns, or issues related to implementing and/or seeking reimbursement for Medicaid School-Based Services. Once we receive your online Clarification Form, we will respond to your question, concern, or issue via email, usually within 2 weeks. Then, we post your question, concern, or issue with our response to the **Clarifications webpage**. If you have an urgent question, concern, or issue, please indicate as such when completing the **online Medicaid SBS Clarification Form**.

Before submitting a new Clarification form, please:

1. Review the Medicaid School-Based Services Reference Guide, linked at the top of this webpage.
2. Browse the **Clarifications webpage** to see if your question, concern, or issue has already been addressed in an existing Clarification.
3. Submit only one question, concern, or issue per Medicaid SBS Clarification Form.

[Click this link to access all Clarifications.](#)

- **Categorized information and clear headers**
- **Comprehensive resource library with advanced search tools** that allows searching by name, file type, provider, audience, age
- **Questions/concerns form and repository of responses** that provides a central location for submitting request and looking back at previously asked/answered topics
- **Medicaid Advisory Committee** includes LEA and DOE reps that collaborate on joint guidance

Example 2

- **News and Announcements** to share critical information
- **Learning Tool** that offers Moodle courses on the basics of local services plan and reimbursement spending report, and support tools
- **Rules and Information** that links fact sheet, key dates, and a program manual
- **Parent program resources** to provide education on services, offering consent, and reimbursement process

Considerations and Questions

- The resource center's scope of features will materialize as complexity, resource intensity, and maintenance capacity are evaluated

As the center is developed and evolves –

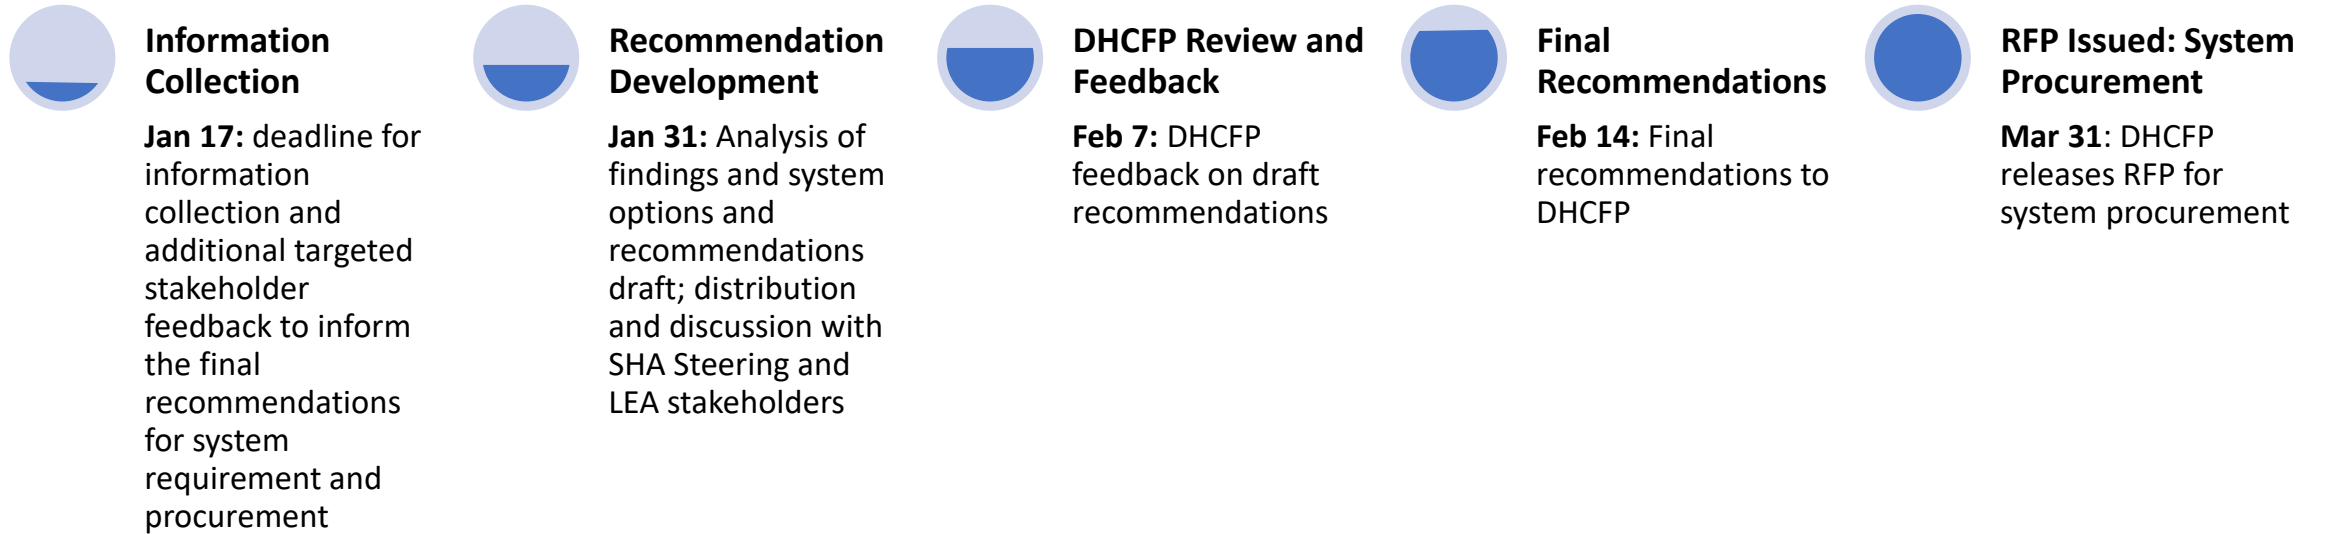

- What skills or knowledge do you feel are important to include?
- What specific challenges or obstacles do you encounter where training or resources could provide support?
- Are there additional training topics that would help you perform more effectively or efficiently?

School Billing System / EHR Procurement

System Recommendations and RFP Timeline

Key Decision Points

What are we solving for?

- What **program or utilization outcomes** does DHCFP want to impact with system procurement?
- What are the criteria and limitations that must be considered?

Who are we solving it for?

- Who is most likely to benefit given how we define success (e.g. program or utilization targets)?
- Will there be any criteria or limitations to **which LEAs** can opt into the state-option system without cost?

How are we going to solve for it?

- What level or **scope of billing system / EHR** should be offered?
- What is the **roll of non-system solutions**, like technical assistance and trainings?

Information Collection

- DHCFP is collecting additional data and information from LEAs and other stakeholders to inform the final school billing system/EHR RFP
- Informational interviews with select LEAs that represent a spectrum of size and resource capacity, current program participation status, and populations of focus
- Email to all participating and non-participating LEAs to collect more detailed information on current systems and documentation processes

LEA Email Review

- Objective is to collect more detailed information on current systems and documentation processes from all Nevada LEAs that would potentially utilize a state-option billing system/EHR
- Email will be distributed this afternoon via the SHS inbox email address with a requested deadline of Friday, January 17
- DHCFP is requesting input from the SHA Steering Committee on language and content of the request to ensure that it is both clear and relevant
 - Any terminology that should be explained/changed
 - Any information that can be provided by NDE (e.g. InfiniteCampus operational or implementation guides / manuals)

LEA Email (Participating)

Dear [Recipient's Name],

To support Nevada's activities related to the CMS School Based Services Grant, we are working with our project vendors to enhance data integration and reporting for school-based health services across Nevada. To better understand current practices and improve alignment with statewide standards, we are seeking input from Local Education Agencies (LEAs) like yours that are currently billing Medicaid through the School Health Services (SHS) program.

Specifically, we would like to request the following information:

1. Internal School Systems

- Name/vendor of system (e.g. InfiniteCampus)
- A description of the data being collected in your legacy school systems (e.g., immunizations, health records, student demographics).
- The format of this data (e.g., CSV, XML, JSON).
- Any data specifications or guidelines currently being followed for this data (user guides, manuals, etc.)

2. IEP Systems

- System(s) name/vendor(s) (e.g. InfiniteCampus, PCG EdPlan, etc. – list all if multiple systems are used)
- A description of the data being documented in your IEP systems.
- The format of this data (e.g., structured forms, free text fields, or exportable file formats).
- Any data specifications or guidelines currently in use for IEP documentation (user guides, manuals, etc.)

3. EHR or Billing Systems

- System name/vendor(s) (e.g. bhworks or Frontline EHR, PCG billing system, etc. – list all if multiple systems are used)
- A description of the data being collected in your EHR or billing systems (e.g., Medicaid service records, procedure codes, diagnoses).
- The format of this data (e.g., ICD-10, LOINC, SNOMED CT).
- Any data specifications or guidelines currently in use for these systems (user guides, manuals, etc.)

Additionally, if you are working with a systems vendor, we request that they provide a sample de-identified data file (meaning no student data included, empty templates only) from your legacy school systems, IEP systems, and EHR or billing systems to help us better understand system outputs.

Your assistance is critical in developing a common conveyance data standard that accommodates existing systems while ensuring future scalability. Please let us know if you require a secure method for sharing this information or have any questions about this request.

Thank you for your cooperation and for helping us improve health services for Nevada students.

LEA Email (Not Participating)

Dear [Recipient's Name],

I hope this email finds you well. As part of our initiative to streamline and enhance data integration for school-based health services across Nevada, we are reaching out to Local Education Agencies (LEAs) to gather information on current data collection practices.

Even if your LEA is not currently billing Medicaid for school-based health services, understanding your data collection processes will help us develop a robust, adaptable data standard that benefits all Nevada LEAs.

Specifically, we would like to request the following information:

1. Internal School Systems

- o System name/vendor(s) (e.g. InfiniteCampus)
- o A description of the data being collected in your legacy school systems (e.g., immunizations, health records, student demographics).
- o The format of this data (e.g., CSV, XML, JSON).
- o Any data specifications or guidelines currently being followed for this data (user guides, manuals, etc.)

2. IEP Systems

- o System(s) name/vendor(s) (e.g. InfiniteCampus, PCG EdPlan, etc. – list all if multiple systems are utilized)
- o A description of the data being documented in your Individualized Education Program (IEP) systems.
- o The format of this data (e.g., structured forms, free text fields, or exportable file formats).
- o Any data specifications or guidelines currently in use for IEP documentation (user guides, manuals, etc.)

3. Other Systems or Processes

- o Details about any other systems or processes used for collecting and managing health-related data (e.g. *bhworks*, other)
- o The format of this data and any standards or guidelines being followed.
- o Any additional information you'd like to share regarding programmatic or system-related barriers to your participation in the School Health System Medicaid billing program.

If your LEA uses a systems vendor, we request that they provide a sample de-identified data file (meaning no student data included, empty templates only) from your legacy school systems, IEP systems, or any other relevant systems to help us better understand system outputs.

Your input is invaluable in ensuring that the resulting data standard reflects the diverse practices and needs of all Nevada LEAs. Please feel free to reach out with any questions or to arrange secure data sharing.

Thank you for your time and support in improving health service data practices for Nevada schools.

CMS School Health Services (SHS) Expansion Grant

Q2 Submission Update and Discussion

Q2 Grant Reporting Requirements

The required CMS SHS expansion grant reporting for Q2, due in January 2025, includes a narrative progress report and an annual data report.*

Specific components, which will be discussed during today's meeting, include:

CMS Q2 Progress Report and Annual Narrative and Data Report Components	
Needs and Infrastructure Assessments	Rural, Tribal, and Remote Area Analysis
Stakeholder Input	Data Analysis Plans and Reporting
Sustainability Plans	CMS Technical Assistance Center (TAC) Participation

*The complete CMS report requirement schedule is included in the Appendix for reference.

Q2 Grant Reporting Requirements

Stakeholder Input

- How can the Steering Committee gauge the success of initiatives under this grant?
- What is the preferred mode of collecting stakeholder feedback?
 - Options could include an online survey similar to the one issued to school districts, an evaluation system, or another option.
- Apart from targeted listening sessions and tribal consultation, are there engagement methods NV DHCFP should consider to ensure input from rural, tribal, and remote areas and/or other specific populations?

Sustainability Planning

- What long-term (i.e., five years post-agreement) service goals should NV DHCFP consider?

Q2 Grant Reporting Requirements

TAC Participation

- What are best practices NV DHCFP should consider in disseminating information and lessons learned from the TAC to schools, LEAs, and other stakeholders?
- Have any Steering Committee members attended a TAC event on behalf of NV DHCFP?
Note: CMS requires we indicate the total number of attendees representing NV DHCFP at each event.

Rural, Tribal, and Remote Areas

- What specific initiatives should NV DHCFP consider to address the unique challenges of delivering SBS in rural, tribal, and/or remote areas?
- Are there any new or emerging developments or trends that could impact the delivery of SBS in these areas?

Q2 Grant Reporting Requirements

Data Reporting

- CMS requires detailed information on NV DHCFP's process for maintaining **statewide service data**, including claims, in addition to **specific data elements at the LEA level** (e.g., number of students with an IEP, number of Medicaid-enrolled students with 504 Plans, number of Medicaid SBS billed to the state).
- To date, NV DHCFP has:
 - Engaged the DHCFP and NDE Office of Analytics to assist with data reporting
 - Reached out to the Nevada Department of Education's Office of Inclusion for data on 504 Plans and IEPs
 - Begun thinking through system and/or process changes needed to collect the required data from disparate locations and merge it with Medicaid claims data

Acronyms

SHA – School Health Access

DHCFP – Division of Health Care Financing & Policy

SHS – School Health Services

CMS – Centers for Medicare and Medicaid Services

LEA – Local Education Agency

EHR – Electronic Health Record

SPA – State Plan Amendment

TAC – Technical Assistance Center

IEP – Individualized Education Plan

504 Plan – plan to remove barriers to learning and ensure equal access

CHIP – Children’s Health Insurance Program

PT – Physical Therapy

OT – Occupational Therapy

EPSDT – Early and Periodic Screening, Diagnostic, and Treatment

FAQs – Frequently Asked Questions

SBS – School Based Services

RFP – Request for Proposal

TA – Technical Assistance

HSPF – Healthy Students Promising Futures

SPCSA – State Public Charter School Authority

SIS – Student Information System
